Well I told them this was a complete guess. They of course needed the information immediately.

Marty that is probably ok for now my suspicion is that this one could be a whopper because the conditions I have observed.

It is possible if we get lucky once we get in we might find a suitable spot - we will probably have more than enough help finding the spot.

The Golf Tunnel was around \$3M with tunnel rehab - done and paid for by the State - and EPA doing the plug.

They asked how much a bulkhead at Gold King would cost. Here is what I said, hope it was OK.

Based on the cost of bulkheads we installed on Sites last year, the cost could be anywhere between 350k and 1.5mil. It all depends on where the competent rock is and how much work is required to clean out and stabilize the tunnel.

I do not think we are even sure a bulkhead could be installed yet.
